Trade show «Mythology of trading...»

Concept: This is a project about desires and ways to achieve balance in relations with the sphere of money...

Trading - trading, buying and selling financial assets.

A trader is a trader. Trading of securities in the stock market is usually meant: shares, bonds, futures, options. Or the currency in the foreign exchange market, or even the commodity market.

Basically, it's the whole world...

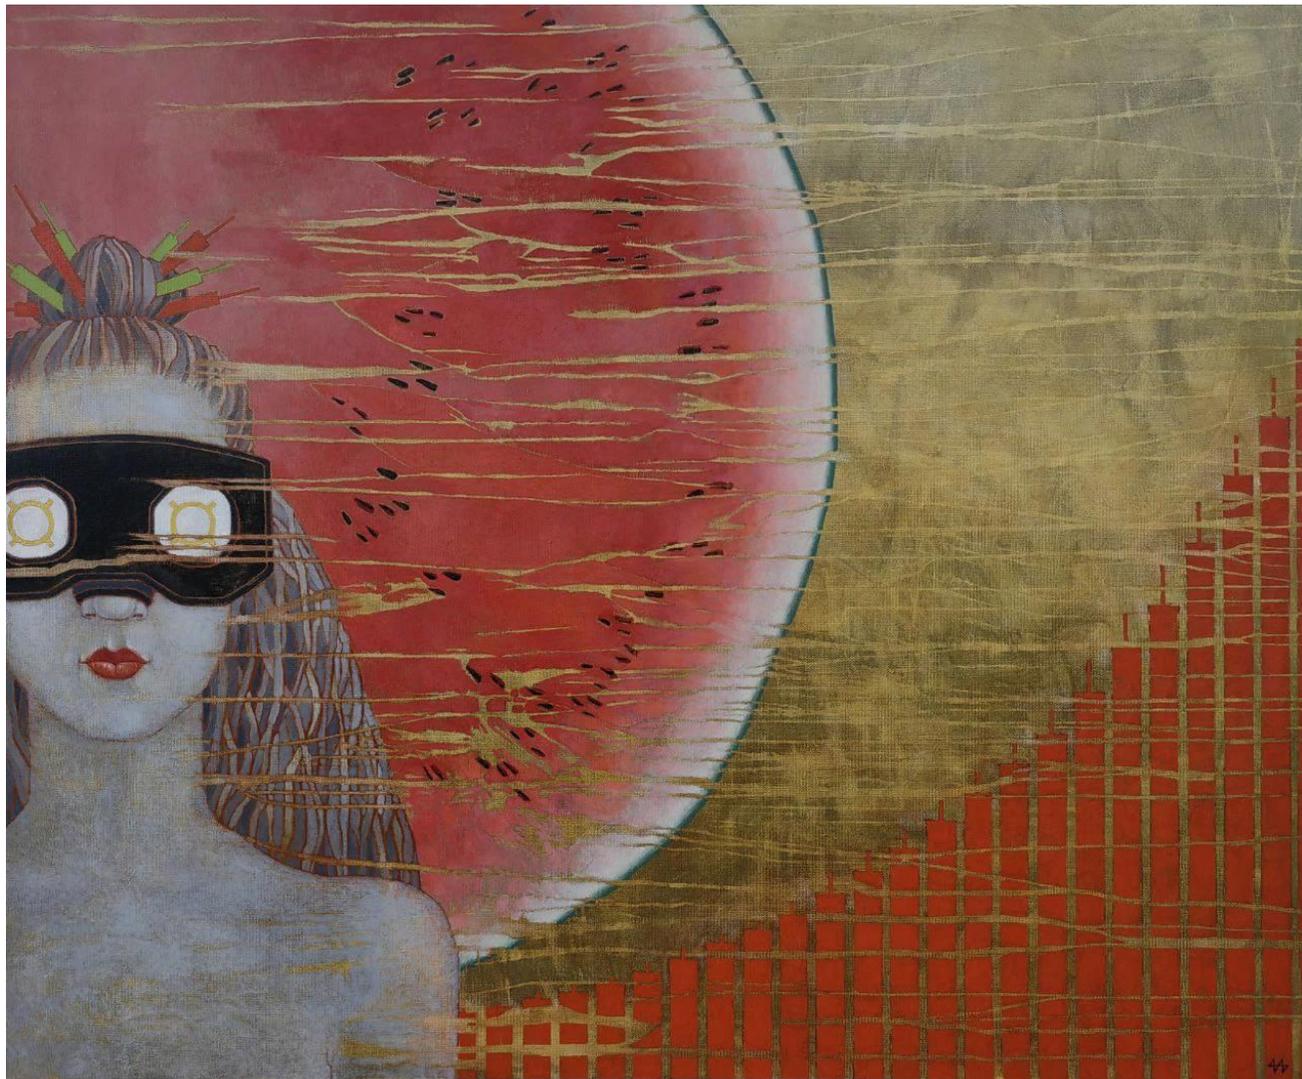

And this project about the mythology of this world...

About the mythology of trading, stock market, stock exchange, the terms and special slang of trading, the nuances of reality and thinking of the people of this community...

The stock market is a kind of religion. Obviously, both are held together by our faith. If we doubt it, the market will collapse as much as the church... Our doubts are exactly what makes the stock market viable. Every day millions of people doubt, hope, believe and analyze, thus creating a course...»

Swedish journalist and writer – David Lagerkranz.

“**Intent on a billion...**” 2022.

canvas, acrylic, oil 150x180 cm

«Keep a clear intention to achieve what is intended, but leave the details of its execution to the unpredictable quantum field».

Joe Dispenza «Meditation to the power of the subconscious».

Watermelon - is not widespread Forex slang, which appeared in Russia in the early 20th century, but did not have time to settle down, in contrast to «lemon», as there was a denomination of the ruble. Watermelon means the monetary equivalent of one billion...

On the background of the watermelon is a black and white figure in viar glasses, on the surface of which is a graph , which is the symbol of any currency standard «Unicode», which is used as an emblem of the whole group of such symbols: \$...

Red and green Japanese candles in the character’s hair...

On the right are the same Japanese candles showing the impossible, growing trend of red candles...

The figure is colorless, as all her attention is in the intention...

Changing valuables...

Acrylic, oil on canvas
100x100, 2015.

Often the simplest things that can bring happiness, with which our world is generously filled, remain outside our time, attention and everyday life in the race for material goods. This happens by itself and imperceptibly for each individual person to one degree or another. Often this race happens completely unconsciously. And it is very difficult to stop, even realizing your participation in it...The canvas depicts a vase built on the principle of iconographic vessels, rather than a linear perspective, instead of flowers, a symbol is placed in it, used as a universal designation of any world currency. Whereas the most ordinary wildflowers serve only as a background, although they occupy the entire space of the canvas, going beyond it...

Catch a black swan and make a blue bird...

canvas, acrylic, oil
90x150, 2023.

"Black Swan" is a term denoting a large-scale, difficult-to-predict phenomenon that has significant consequences for world politics, the economy and people's lives. The author of the term is Nassim Nicholas Taleb. Black swans are any wars, financial crises, the collapse of the USSR, world economic crises and the like. Of course, a lot of bad things happen at the same time. But... With a competent approach, during such an event, there are also opportunities for profit, for example, to make money on the stock market. And here, in addition to working capital, you need to be reasonable, calm and properly attuned to what is happening around... «The free market works because it allows a person to catch luck on the way of gambling trial and error, and not to get it as a reward for diligence and skill. That is, my advice to you: experiment to the maximum, trying to catch as many "black swans" as possible» Nassim Nicholas Taleb.

Guru of Trading...

Oil on canvas, acrylic
150x180, 2023.

TRADING GURU?

Reality or utopia?

Everyone would like to find it in order to understand everything, learn everything and trade only in a plus. And it probably exists somewhere... Like Shiva, dreaming of visions of our world, on top of Kailasa... or like a stylite in Christianity, choosing a special kind of asceticism: prayer on a "pillar"... Somewhere in the Himalayas, a trading guru is levitating above the clouds over a mirage in the form of a Japanese candle. Simultaneously follows a billion charts, meditates and listens to punk rock... And any trader can become a guru by correctly defining his austerities and following them. You just need to define it correctly... "We are all doomed to profit," is the phrase with which the Stockbroker Mikhalych, aka Mikhail Nikolaevich Saimonoff, ends his videos. It is not a financial recommendation.

Three red and three green Indians...

handmade paper, markers

15x19, 2021.

The pattern «Three Indians» has many names, but this is probably the most imaginative. Got it from the hand of the famous stock trader Linda Raske.

The meaning of this pattern lies in the features of formation and reversal properties. The figure emerges at the bottom or top of the market, showing the trader the probability of a quick reversal.

Nothing teaches you what you can't do, like losing everything you have or Japanese candles...

Handmade paper, markers
15x19, 2022.

Nothing teaches you better than to lose everything you have. And when you realize that you can not do or lose money, you begin to learn what to do to win». The novel by Jesse Livermore «Memories of a Stock Speculator».

Japanese candles are the most popular way to read price movements on charts.

Phoba is a practice of consciousness transfer.

The word «phwa» is translated from the Tibetan language as «movement».

The result of this practice, depending on the ability and training of the practitioner, may be the attainment of enlightenment, the transfer of consciousness to the Pure Earths, the higher worlds, or the attainment of a favorable rebirth.

"When executing a phova, always pay attention to concrete signs of its implementation. It is believed that this place on the top of the head (fontanel) is so soft that you can insert a thin twig or feel tickling there." Chogyal Namkai Norbu Rinpoche.

Guru of Trading...

handmade paper, markers
15x19, 2022.

Trading guru? Who is he? Where is he?

As a staircase in Christianity chooses a special kind of ascetic: a prayer on the «pillar», with all the nuances involved, so any trader can become a guru, correctly defined his ascetics and following them...

In the course of its activities, the trader interacts with the market, and the market is a constant movement. The market is always developing, smarter...

In interaction with the market, the balance between calculation and irrational guessing, market sense...

Not a financial recommendation.

Bullish pennant...

Handmade paper, markers, acrylic
24x39, 2022.

The «Bullish pennant» pattern is formed immediately after a sharp rise in the price and has the shape of a triangular flag. It gives the signal to buy after its upper boundary is breached, the resistance line...

A pattern in trading is a figure formed on a graph. The basic rule of this kind of analytics - history repeats itself. When a Technical Analysis figure appears in the trading terminal, the trader realizes that the price is likely to behave in the same way as in most cases when the pattern appears on the chart earlier.

Black has white, white has black...

Diptych.

Canvas, acrylic, markers

40x40, 40x40, 2023.

If there is a term "black swan", then why not be a "white swan"...Although in the world of trading, "white swan" is not particularly popular ...But after all, "black swan" is always a "white swan" for someone..."Black Swan" is a term denoting a large-scale, difficult-to-predict phenomenon that has significant consequences for world politics, the economy and people's lives. The author of the term is Nassim Nicholas Taleb. Black swans are any wars, financial crises, the collapse of the USSR, world economic crises and the like.

IRINA IVA

There is always profit, you just need to see...

Diptych.

Canvas, acrylic, markers

40x40, 40x40, 2023.

The history of the bull and bear markets begins in the stock exchange game back in the XVIII century... A bull market is a growing market. A bear market is a falling market. "Bulls" are those who at certain moments play for a price increase. "Bears" – those who, in contrast to the "bulls", are confident that the price of the asset will fall. Both there and there, the trader is able to make a profit if... The market is a constant movement. And in interacting with him, the balance between calculation and irrational guess, the feeling of the market, is important... This feeling is depicted in the form of a grapheme used as a universal designation of any world currency, in place of the interbrow chakra of the characters of the diptych. This chakra is the abode of the "subtle discerning mind, manas"... It is not a financial recommendation.

Black Swan...

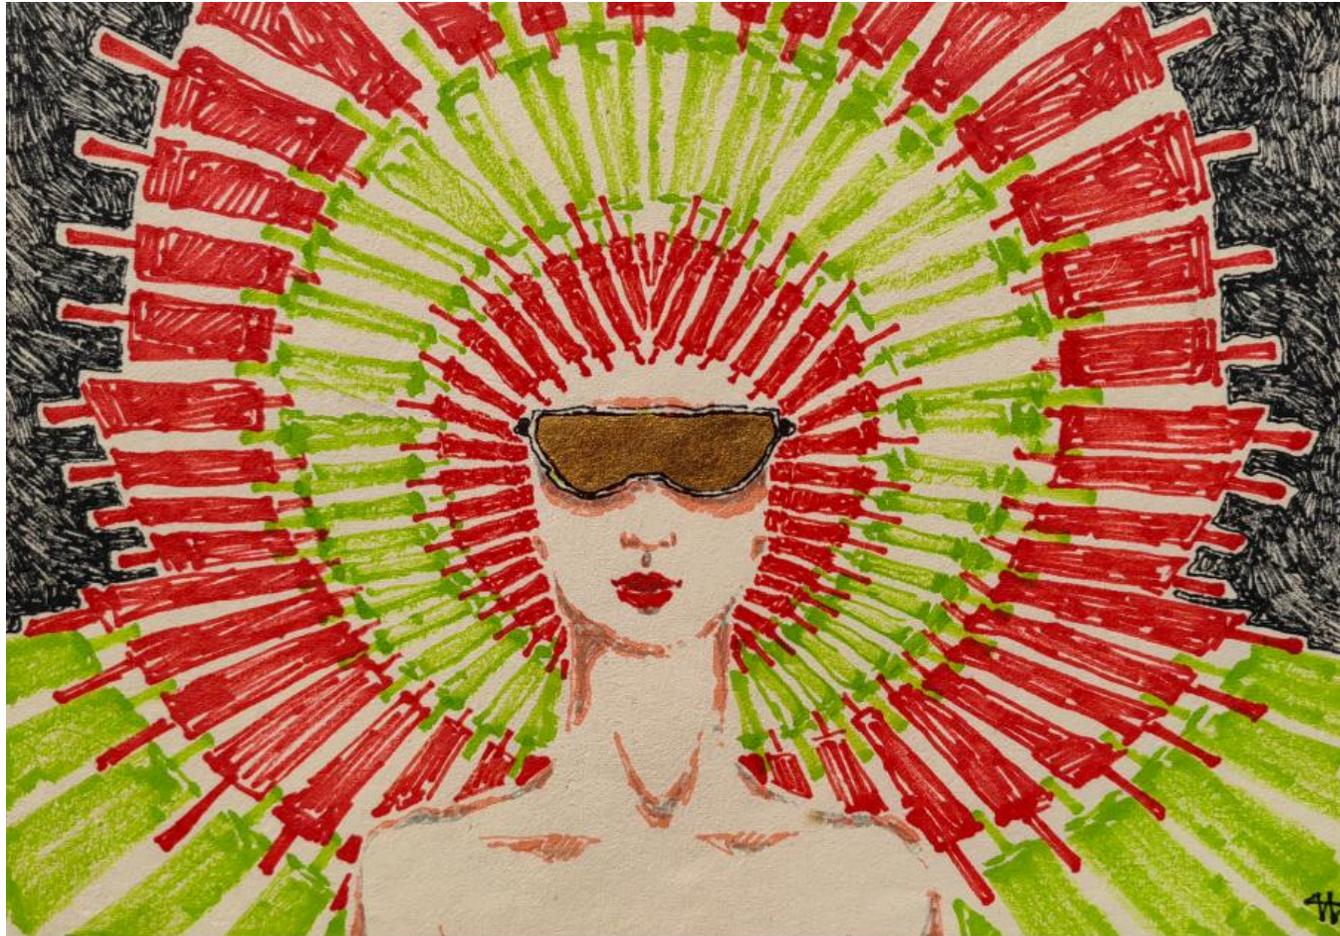

handmade paper, markers
24x39, 2022.

«Black Swan» is a theory that deals with difficult-to-predict and rare events that have significant consequences...

The author of the theory is Nassim Nicholas Taleb, who in his book "Black Swan. Under the sign of unpredictability" proves that randomness affects history and financial markets much more than the pattern...

Nassim Nicholas Taleb is a philosopher, former trader and risk manager.

I know Steve Neeson's secret...

handmade paper, markers

21x29, 2023.

Japanese candlesticks are the most popular way to read the price movement on charts. The first mention of candle patterns can be found in the Japanese rice trader Homma Munehisa in the 1700s. And almost 300 years later, candles were rediscovered by Steve Neeson in his book titled "Japanese Candles. Graphical analysis of financial markets". If you achieve perfection in reading charts from "Japanese candlesticks", you as a "deity" get the ability to see "where the gold lies" ...

But there are no limits to perfection...

IRINA IVA

Divas...

handmade paper, markers
15x19, 2022.

And so the DIVAS came...they are desirable and beautiful, they have perfect emerald-green bodies and halos in the form of a sign used to denote all world currencies..."Divas" in the language of stock traders are dividends. One of the forms of systematic income generation by shareholders. Divas or devas are supernatural humanoid beings with the appearance of giants. They are present in the mythology of many peoples.

Divas are famous singers in the opera art.

IRINA IVA

The black swan will give you what you take...

handmade paper, markers

15x19, 2021.

«Black Swan» is a term for large-scale, difficult-to-predict phenomenon with significant consequences for world politics, economy and people's lives...

The author of the term is Nassim Nicholas Taleb, who in his book "The Black Swan. Under the sign of unpredictability" proves that randomness affects history and financial markets much more than the pattern... Taleb calls such events «black swans», because until a certain time it was believed that there were no black swans. Black swans are all wars, financial crises, the collapse of the USSR, world economic crises and the like. That is, all that changes the course of history. But with the right approach, any event can be turned to your advantage, for example, to earn on the stock market...

The free market works because it allows a person to catch luck in the way of gambling trials and mistakes, rather than get it as a reward for diligence and skill. That is my advice to you: experiment as much as possible, trying to catch as many «black swans».

Nassim Nicholas Taleb.
